PROJECT REPORT

Project Title:

Simple calculator Website

Internship:

Web Development Internship - RixiLab

Intern ID : RL25020114

Name:

Manepalli.srihari

Submission Date:

September,05,2025.

Technologies used :

HTML, CSS, Javascript.

Project Summary:

1.This project successfully developed a responsive calculator website capable of performing basic arithmetic operations with accuracy.

2.The interface was designed with a clean layout and user-friendly styling to improve usability

3.Responsiveness ensures smooth functionality on both desktop and mobile devices, making it widely accessible.

Conclusion:

The project demonstrates the effective use of HTML, CSS, and JavaScript to create a practical and interactive web application.It highlights the importance of responsive design in enhancing user experience across devices.

This project lays the foundation for future improvements, such as adding advanced mathematical functions or a history feature.
